- >> Internal rack shelves as standard
- >> 19" Mains Power mounting options
- >> Power socket provision with interchangeable blank
- >> Efficient natural convection cooling system
- >> Lower fabric panel in a range of Blazer Lite Fabric
- >> Black or white metalwork as standard

Overview

Designed for 'Lectern-less' room designs, the Active Learning Terminal (ALT) is a wall mounted box that neatly stores AV oIP or small form factor equipment via a removable perforated rack board and finished off with a fabric panel which can be slid to one side to reveal a lock.

The upper panel can be completely customised with cut outs to suit touch panels and input plates. The lower panel is covered in fabric from the Camira Blazer Lite range so can change to suit room aesthetics. The rack board also works with the Mid-Atlantic cable tidy clips to ensure cables are dressed neatly inside.
